Waves

MATERIALE BREVETTATO S.G.D.G.

ONDEMETRE TURENNE

Primary" instrument for the practice of the Turen Method.

Creates an 8-metre "carrier" wave.

Indispensable for the use of the Universal Regulator.

Radio-activates each element.

It is useful in many researches: wave readings on the map or on the map of a house, in researches of underground waters, minerals, etc.

It also activates the carrier wave on the Boite E.M. when remote wave care treatments are desired.

UNIVERSAL PENDULUM with magnetic needles

It allows to trace and select, thanks to the position of the magnet needles, every type of wave: horizontal waves, vertical waves, positive or negative waves, EST-OVEST or NORD-SUD waves, Infra-wave and Ultra-wave, radioactivity.

GREEN SEMPLE wood pencil (radioactive)

Only horizontal waves can be tracked.

UNIVERSAL RULER TURENNE

Together with the Universal Pendulum and the Wavemeter this device is fundamental because it allows measurements of wavelengths, of wavelengths and on the third antenna the identification of 92 Mendeleevians.

It is the basis for any qualitative and quantitative research.

Applied to the human body, for example, is useful to measure the health wavelength of a person, to measure the deficiency of each of the organs of the human body separately. It also allows to find the deficiencies of metals inside the body, to measure the effectiveness of remedies and drugs before using them, to establish a diet by itself, etc

The optimal health wavelength of a body is 8 meters,

(a measure of the harmonic corresponding to the amplification of 2,500,000 times the actual length expressed in "microns").

It is also indispensable for studies and experiences of various kinds.

BLOOD PRESSURE RULE, PH and GLOBULI

It measures blood pressure, blood PH (acid or basic) and the strength ratio between red and white blood cells.

Of course, this instrument, like others, allows measurements of people far away when you have the Individual Witness.

Note: detailed instructions for use will be attached to each appliance.

RULES OF 7 HUMAN BODY FUNCTIONS

The seven main functions are: Circulation, Vitality, Breathing, Nutrition, Reproduction, Glands, Construction (skeleton - bone - cartilage).

In each of the wave capsules contained in the Regolo, the waves of the organs corresponding to each of the 7 Functions have been grouped.

This allows the dowsing to measure the alterations of each function and then to identify the bodies involved through the appropriate witnesses.

An eighth witness with waves of "disease" was added to the ruler.

Each family of organs and functions corresponds to one colour of the spectrum.

RULES OF 7 WATER TYPES

Necessary to recognise that a mineral water belongs to the relevant family of 'heavy water'.

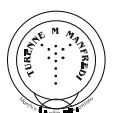

Each person has the vibrations corresponding to 3 "heavy water" in them.

This rule allows to recognize the 3 mineral waters (heavy) favourable to each person. The intake of water improper to the vibrations of the person, can be the primary cause of disease or serious imbalance.

PRECISION RULE

Among the measuring devices invented and manufactured by Turenne, for example thermometers, scales etc..., we decided to keep in production the so-called "Precision" rule.

The device allows to verify the precise functionality (Delay - Accuracy - Advance) of body parts, mechanical watches or other mechanisms.

DISCO ZODIAC

This disc, created by Turenne before World War II, already indicated the order of formation of matter and the "elements of Atomic Disintegration". It indicates the seven colors of the spectrum, below and in their place: Infra-Red and Ultra-Violet; then White and Infra-White, Black and Infra-Black.

Outside the Mendeleevian Elements of Disintegration 93, 94, 95, 96, 97. It is useful for identifying, for example, Elements contained in a stone or crystal, but also in a carrot or any food product. Without arriving at such "specialized" uses, the ZODIAC DISCO is very important and useful for the control of the HEALTH STATE.

Just place your finger or Individual Witness in the center of the disc, to immediately detect the general vibration emitted by the whole body and notice imbalances and deficiencies.

At this point you can add, in the center of the disc, some remedies or better of the Catalyst Momos and choose which of them brings the state of health to the optimal condition.

Note: detailed instructions for use will be attached to each appliance.

ENERGY" DISK

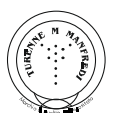

In living organisms (but also in the environment) there is a type of energy that has not yet been "transformed", an ENERGY POTENTIAL FORM destined to transform itself into a "VITAL FORCE" to feed electromagnetic phenomena and the Life of Living Beings!

This equipment is necessary to "measure" the reserve of this ENERGY, which has remained available in the person, or animal, or plant, or environment. Let us not forget that a serious lack of this Energy means that "one is always sick and cannot heal".

Many doctors tell us about "patients" with all the clinical examinations in order, but who can not feel healthy and alive: we answer "I'm without vital energy"!

The importance of this instrument is therefore clear.

Only after this verification - primary and basic - will it be possible to determine what decision to take to "correct" the Electro-Magnetic Plan - and biochemical with the choice of remedies for the restoration of health.

ELECTRO-MAGNETIC BOITES (E.M. BOITES) "RADIONICS TURENS

With the help of the Individual Witness, BOITE E.M. can transmit to a person - no matter how far - the beneficial waves of "remedies" or MOMOS Catalysts. The waves of BOITE E.M. are also sent to the person, which are special waves of form, Infra-wave, Ultra-wave, the waves of 7 colors, 44 metals of the human body, all of a length of 8 meters, therefore favorable to health.

INDIVIDUAL WITNESS

(from a drop of blood)

It is a true "DOUBLE" of your person, made using a patented TURENNE . It is a device for the reception of all the vibrations that make up the person and that the person "emits" (T.S.F. wireless transmission).

Any wave variation throughout life and wherever you are follows "at any time". It is done once and for all and allows any kind of reading just like on the person himself; it is also essential to be cured through waves, with the special Boite E.M. Turenne and the "remedy" catalysts previously chosen for the examination on the

UNIVERSAL RULER.

Note: detailed instructions for use will be attached to each appliance.

TURENAMOUS WITNESSES WITHOUT PARASITES - PERENNIAL - UNALTERABLE MADE BY WAVE IMPREGNATION

There are 14 cases available, each containing 40 "inalterable" witnesses at 8 meters in a glass tube, useful for research on the Universal rule of organ deficiencies, metal deficiencies or wavelengths modified by the presence of disease.

TURENNE WITNESSES

without parasites - perennial - unalterable
made by wave impregnation

There are 20 Witnesses (in glass tube) collected in special cases "T" "U", essential to the dowsing doctor for the identification of vital waves and harmful waves. The "unalterable" witnesses, realized at a wavelength of 8 m, can be used at the table on Turenne instruments, outdoors for investigations on ground - water - environments, but also by all the Radiesthetists who practice traditional Radiesthesia.

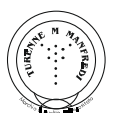

N.B.: Like all Turenamo Witnesses, these can be manipulated without risk of contamination.
